

Diabetes Health Fair

Tuesday, November 13, 2012

3-7 p.m.

Hospital Lower Level

New River Medical Center is committed to helping members of our community learn how to better manage and prevent diabetes.

More than 26,000 Minnesotans are newly diagnosed with diabetes every year. Additionally, many people living with diabetes, or prediabetes, are not aware of the steps they can take to help themselves feel better and manage their overall health.

If you or someone you love is living with diabetes, visit New River Medical Center's Diabetes Health Fair to receive information on making healthier lifestyle choices including:

- Free blood pressure checks and glucose screenings.
- Tips for making healthy food choices.
- Interactive education on the newest diabetes products, technology, resources and treatments.
